Commonalities for all 6 states:

1. State attests to secular alternatives and genuine beneficiary choice before claiming federal funds;
2. Facility determines practitioner qualifications; practitioners must be employed by or contracted with a qualifying IHCP;
3. No specific list of covered practices;
4. HCPCS H0051 is the existing code for traditional healing.
5. Federal approvals leave it to each facility to decide who it can serve. IHS and Tribal facilities may also serve other Medicaid/CHIP beneficiaries under 25 U.S.C. 1680c. The 100% FMAP applies only to AI/AN beneficiaries served at IHS/Tribal facilities.
